

FRĒ POWER

FOR iPhone 6

LIFEPROOF

INTRODUCING

LIFEPROOF FRĒ POWER FOR iPhone 6

There comes a point in every run, every climb, every adventure when your body — and phone — hits the wall of exhaustion. While you pause to find your second wind, FRĒ Power for iPhone 6 refuels your device with it's built-in battery pack. This fresh burst of energy empowers you to power up, stay connected and charge ahead!

2x BATTERY LIFE. 4x PROTECTION.

There are no power outlets in the wild, but FRĒ Power packs its own juice. Equipped with a 2,600-mAh battery, it delivers 2x battery life so you can keep navigating maps, streaming music and capturing memories. Plus, it's waterproof, dirt proof, snow proof and drop proof to go everywhere and survive everything.

DISPLAY DEFENSE

Featuring a built-in scratch protector, FRĒ Power keeps iPhone 6's brilliant Retina display flawless and Touch ID fully functional. This protective membrane is so clear and so thin, you barely notice it's there — until you're glad it is.

INTELLIGENT DESIGN

FRĒ Power's smart circuitry is optimized for perseverance and speed. Auto-Stop Charge technology halts the powering process when your iPhone reaches 100%, saving energy for later. And, Rapid Recharge refills the case battery fast, so you can hurry back to the action.

MINIMAL SIZE. MAXIMUM FUNCTION.

FRĒ Power is stripped down to the absolute minimal size to preserve your iPhone 6's sleek shape and slight weight. Its custom design keeps all the buttons, controls and features fully functional. Plus, an AR-coated lens cover and Sound Enhancement System ensure vibrant pics and rich tones.

ONE CASE. FOUR PROOFS.

WATERPROOF | Dive deeper | Submersible to 6.6 feet / 2 meters for 1 hour

This protection goes deeper than accidental spills and splashes.
Your iPhone 6 is safe in, on and under the water.

DIRT PROOF | Ride faster | Sealed from dirt + dust

The outstanding water protection also blocks dust and dirt.
Use iPhone 6 on the job, in the field, at the beach — anywhere.

SNOW PROOF | Go further | Closed to snow + ice

FRĒ keeps water and dirt out, so it's perfect for blocking snow and ice.
Take your phone into the wilds of winter without worry.

SHOCKPROOF | Play harder | Survives drops from 6.6 feet / 2 meters

Drops are the No. 1 cause of iPhone 6 damage. FRĒ Power meets military drop specs to help your phone survive this most common cause of damage.

Dimensions: 6.11" x 3.10" x 0.46"

Weight: 4.33 oz. **MSRP:** \$129.99

LAB TESTED

WATER TEST

All cases are factory water tested. Then random units undergo additional independent inspection, including a second water test. Cases that pass are shipped. Failures are scrapped.

MIL STD 810G-516.6

The US Military Standard for drop and shock protection. It requires that LifeProof cases physically withstand the drops, fumbles, vibrations and bumps you encounter day to day.

IP-68

The international standard for Ingress Protection (IP). 6 and 8 are the highest ratings for solids and liquids. Cases rated to the IP-68 standard keep dust, dirt and water out.

UNLEASH THE REMARKABLE

Action and adventure are primal urges. And to satisfy them, you need to go places, do things, take chances and be free. You need to feel your heart pounding in your chest and the icy rush of adrenaline in your veins.

Sharing your taste for adventure, LifeProof makes products that let you live life with no limits. Keeping your device protected and you connected, LifeProof is the freedom to unleash your remarkable.
