INTRODUCING

LIFEPROOF FRĒ FOR GALAXY S6

The world is wide open for exploration, and LifeProof FRĒ for Galaxy S6 goes with you every step. Waterproof and drop proof, FRĒ travels everywhere and survives everything. Snow-capped summits, salt-sprayed shores, mud-caked trails — no terrain is too tough for your FRĒ-equipped Galaxy S6.

TOUCHSCREEN PROTECTION

Featuring a built-in scratch protector, FRĒ keeps Galaxy S6's 5.1" Quad HD touchscreen flawless and Fingerprint Sensor fully functional. This protective membrane is so clear and so thin, you barely notice it's there — until you're glad it is.

BRAVERY BUILT IN

Inside FRĒ, your Galaxy S6 is free to go where other phones fear to tread. Paddle far beyond the jetty. Cycle way off the beaten path. Ski deep into the backcountry. FRĒ thrives in harsh environments and perseveres in punishing elements, so you can document your deeds along the way and share your stories at the source.

MAXIMUM MINIMALISM

Every gram counts when you're hiking, biking or boarding. To keep the weight in check, FRĒ is constructed to the absolute minimal size while maintaining a strong backbone. And, its form-fitting design leaves your Galaxy S6 feeling natural in your hand.

ALL-ACCESS PASS

FRÉ doesn't get in the way of your favorite Galaxy S6 features. Snap razor-sharp shots with the 15 MP camera. Monitor your pulse with the Heart Rate Sensor. Unlock your phone with Fingerprint Sensor. Every button, port and control remains active and accessible.

ONE CASE. FOUR PROOFS.

WATERPROOF | Dive deeper | Submersible to 6.6 feet / 2 meters for 1 hour

This protection goes deeper than accidental spills and splashes.
Your Galaxy S6 is safe in, on and under the water.

DIRT PROOF | Ride Faster | Sealed from dirt + dust

The outstanding water protection also blocks dust and dirt.
Use Galaxy S6 on the job, in the field, at the beach — anywhere.

SNOW PROOF | Go further | Closed to snow + ice

FRĒ keeps water and dirt out, so it's perfect for blocking snow and ice.
Take your phone into the wilds of winter without worry.

SHOCKPROOF | Play harder | Survives drops from 6.6 feet / 2 meters

Drops are the No. 1 cause of Galaxy S6 damage. FRĒ meets military drop specs to help your phone survive this most common cause of damage.

- Thin, light, tough all-protective case
- Full screen protection and functionality
- Complete access to buttons, ports and controls
- Works with Fingerprint Sensor
- Anti-reflective optical-glass camera lens
- Maximum sound output and clarity

Dimensions: 6.1" x 3.2" x 0.6"
Weight: 1.6 oz. **MSRP:** \$79.99

LAB TESTED

WATER TEST

All cases are factory water tested. Then random units undergo additional inspection, including a second water test. Cases that pass are shipped. Failures are scrapped.

MIL STD 810G-516.6

The US Military Standard for drop and shock protection. It requires that LifeProof cases physically withstand the drops, fumbles, vibrations and bumps you encounter day to day.

IP-68

The international standard for Ingress Protection (IP). 6 and 8 are the highest ratings for solids and liquids. Cases rated to the IP-68 standard keep dust, dirt and water out.

UNLEASH THE REMARKABLE

Action and adventure are primal urges. And to satisfy them, you need to go places, do things, take chances and be free. You need to feel your heart pounding in your chest and the icy rush of adrenaline in your veins.

Sharing your taste for adventure, LifeProof makes products that let you live life with no limits. Keeping your device protected and you connected, LifeProof is the freedom to unleash your remarkable.
